

Xtreme Vortex Risk Assessment for Inflatable Moon Bouncer – The Five Step Approach

Step 1	Step 2	Step 3	Step 4	Step 5		
Identify the hazards	Who might be harmed and how?	What are you doing already?	Risk Rating	Action required	Responsible person	Date completed
Over enthusiastic participants	Participant/ Operator	Keep participants of similar size, height and age together. Remove participants who are likely to cause problem on activity.	Low	Constant supervision and barriers used as required.	Operator	Ongoing
Jumping off unit	Participant/ Operator	Additional safety mats in front of unit exit. A safe and controlled exit is recommended.	Low	Constant supervision.	Operator	Ongoing
Larger participants colliding with smaller participants	Participants	Participants put into groups of similar size, age and height	Low	Constant supervision.	Operator	Ongoing
Tripping over anchorage points/spare equipment/electrical cables	Participants/ Crowd	All anchor points used as per manufacturer's instructions and spare equipment either stored away or erected safely. Where possible, electrical cables should not cross any public pathway. If unavoidable, cables sited overhead or covered.	Low	Constant supervision. At busy events, additional safety fencing erected.	Operator	Ongoing
Injury as a result of improper behaviour	Participants/ Crowd	All participants are fully briefed prior to use. Any participants not adhering to the rules will be removed from the activity and not permitted to return.	Low	Constant supervision.	Operator	Ongoing

Heavy rain	Participants/ Crowd	Activity not to be used in heavy rain.	Low	Constant supervision.	Operator	Ongoing
Heavy wind	Participants/ Crowd	Activity not to be used in excessive winds.	Low	Constant supervision.	Operator	Ongoing
Stormy conditions/lighting	Participants/ Crowd	Activity not to be used in stormy conditions. In threat of lightening, the activity must not be used. The activity must be deflated.	Low	Constant supervision.	Operator	Ongoing
Injuries occurring during unsupervised use/access	Participants/ Crowd	Activity is not permitted to be used unsupervised. The activity will be deflated when not in use and access restricted after the last daily session on multiple day bookings.	Low	Constant supervision.	Operator	Ongoing
